Timing of posting on JHR's website

Data is scheduled to be posted when JHR releases its financial report and midterm financial report (February and August each year).

Rationale for change

One of the reasons is to simplify Financial Results Briefing in response to the growing number of hotels that disclose business performance (17 hotels as of August 20, 2015) due to JHR's realization of external growth and the other is to improve convenience for investors by offering data in Excel format.

JHR will keep on making efforts to offer easy-to-understand information for investors.

Dashboard

InDyne PIMS360's Logistics Management module is a DoDIA compliant application that provides for the identification, control, tracking and management of property, equipment, tools, supplies, and expendable materials including HAZMAT. Functions include Barcode technology that streamlines inventory and property management and significantly improves property audit processes as well as accurate location data, check-in/check-out custodian history and accountability and where applicable, and status reporting. Logistics Management also integrates requisition and procurement functions tracking orders from initial submission to material receipt with electronic approval while providing an electronic audit trail. It can be configured to automatically re-order based on inventory levels. Extensive reporting capability includes FAR compliance reports (equipment excess report, monthly property management report, property loss rate calculation, and quarterly reports of contractor acquired property).

Logistics Summary

Repair (83)
Equipments (4985)
Materials (12120)
