Steam and electric rail statistics summarized. About PublisherForgotten Books publishes hundreds of thousands of rare and classic books. Read more on www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, maintaining the original format while repairing the imperfections in the aged copy. In rare cases, an imperfection in the original, such as a bleeding or missing page, can be replicated in our edition. We do, however, repair most of the imperfections successfully; any remaining imperfections are deliberately left to preserve the state of such historical works. We use cookies to remember your preferences, such as your preferred shipping country and currency, to save items placed in your shopping cart, to track website visits reported to our advertising partners and to analyse our website traffic. See website: 15 February 2017 The system that causes the propulsion of a vehicle in which the driving force or traction force is obtained from various devices such as electric motors, steam engine drives, diesel engine diving,is known as traction system. The traction system can be widely classified in two types. These are electrical traction systems, which use electricity, and non-electric traction systems, which do not use electricity for vehicle propulsion.
