How to pay ez pass violations online nh

If your license plate is currently in violation or has past violations you are not eligible to use this payment method. Please contact Customer Service at 1-888-MTA-PASS (1-888-682-7277). You can use this page to make a toll payment if you do not have an E-ZPass account and you passed through a lane on the Maine Turnpike that was not staffed by a toll collector. For example, you may have seen a Toll Collector Temporarily Unavailable sign or you may have accidentally driven through an E-ZPass Only lane. Click on the map to open toll wiki for a country/state There are three turnpikes in New Hampshire: 1. Blue Star turnpike 2. Spaulding turnpike (also known as the Eastern turnpikes) 3. FE Everett Turnpike or Central turnpike Blue Star Turnpike The Blue Star Turnpike[1] extends from the Massachusetts state line in Seabrook to the Maine state line in Portsmouth. It parallels the seacoast and is the major artery for tourist traffic to the New Hampshire coast. The route also connects with several major highways in NH, including NH 101, US 4 and the Spaulding Turnpike. Spaulding Turnpike The Spaulding Turnpike[2] extends from Portsmouth to Exit 18 in Milton. At 33.2 miles, it is the major north-south artery in the eastern corridor of the state. The turnpike connects the Blue Star Turnpike (I-95) to NH 16 (the major roadway to northern New Hampshire in the eastern portion of the state). F E Everett Turnpike F. E. Everett Turnpike[3], also known as the Central Turnpike, extends from the Massachusetts state line in Nashua to Exit 14 in Concord. It constitutes a portion of US Interstate Highways 93 and 293. It connects three urban centers in New Hampshire (the cities of Concord, Manchester and Nashua). The route also connects with the major East-West roads in New Hampshire (NH 101, US 4 and I-89). There is only one toll road in New Hampshire: Mt Washington Summit road[4]. Located north of North Conway, on scenic NH Route 16, the Mt. Washington Auto Road's unique location in Pinkham Notch provides spectacular views into the Great Gulf Wilderness and the Presidential Mountain Range. It costs \$29.00 to use the toll road leading to the Mt. Washington. Use New Hampshire Toll Calculator to calculate tolls and gas costs for all the turnpikes and toll road in New Hampshire. New Hampshire Toll Calculator Toll rates in this section might not be updated recently. Please refer to our toll & trip calculators and the Toll API for latest toll rates. Please send us a feedback if toll rates are not accurate. We will update the information immediately. In New Hamshire, trucks pay tolls on Blue Star turnpike, Spaulding turnpike, and FE Everett Turnpike based on number of axles. However, trucks typically do not go on Mt. Washington Summit Road. Calculate truck tolls to travel through all the turnpikes and the toll road in New Hampshire using Truck Toll Calculator. In New Hampshire, you can pay tolls via E-ZPass system known as E-ZPass NH or by cash. NationalPass is also accepted across all toll facilities in New Hampshire. Non-NH E-ZPass Account holder's fare rate is the same as the cash rate. For more details, please reach out to E-ZPass NH customer service center at toll-free number: (877)643-9727. You cannot pay tolls by video system such as Pay-By-Plate in New Hampshire. If you missed a toll in New Hampshire, you can pay it online within 7 days without any fine. Post that grace period, a toll invoice will be sent to the vehicle owner with a fine amount - which keeps increasing with delay in payment. Learn about ways to pay missed toll in New Hampshire. NH or E-ZPass New Hampshire or [5] is an electronic tag that you can install in your windshield to zoom through electronic toll gantries. You don't need to stop to pay toll. It is part of the E-ZPass network and is accepted in all the states where E-ZPass is valid. But with E-ZPass NH you get the most discounts on New Hampshire turnpikes and toll road. Learn details of accounts and offerings of E-ZPass NH. The Bureau of Turnpikes at New Hampshire Department of Transportation[6] manages New Hampshire turnpike system. For any questions about toll rates or payment methods, please get in touch with them. Calculate routes, tolls and fuel costs for your travel by car, truck, taxi, bus, caravans (with or without a trailer) in New Hampshire and other states of the US using TollGuru Trip Calculator. It also shows the cheapest, fastest and other optimal routes to your destination along with toll plaza(s) location enroute, payment methods and more. Rideshare, OEM, TMS, fleet companies and other transport businesses can leverage toll intelligence by integrating with the TollGuru Toll API for pre-trip calculation and post-trip reconciliation. Many toll agencies have already converted to all-electronic tolls, meaning cash is not accepted. On roadways that are all-electronic, toll payments may be made by one of the following methods: Toll Pass / Transponder Toll transponders issued by state or regional tolling agencies are, typically, the preferred method for making toll payments. When using a compatible toll pass, your tolls are automatically deducted from your prepaid account. The compatibility of a toll pass will depend upon the state in which you travel and the roadway being used. Our Toll Pass section has a complete list of compatible roads for each state. Toll pass networks are becoming more integrated, particularly across the eastern United States and the Southern Plains, but many states are also opting to use isolated networks and charge by license plate, as well. License Plate / Mail Many agencies offer what is called "Pay by Plate", "Toll by Plate", "Pay by Mail" or similar options. Using this method, drivers do not need cash or a compatible toll pass. Instead, this payment method involves taking a snapshot of your vehicle's license plate, then issuing a toll invoice. Toll invoices are generally mailed once per month, and they are sent to the address on file with the state where the photographed vehicle is registered. Toll invoices may include an administrative fee for issuing the invoice. What Are Registered And Unregistered Plate Accounts? Registering a licence plate simply means you have provided your vehicle information to the tolling agency responsible for handling licence-plate billing. Often, registering a license plate may result in reduced tolls, similar to using an agency-issued toll pass. Unregistered license plate only means you have not provided your license plate to a tolling agency that issues toll invoices. If a roadway offers a "Pay-by-Plate", "Toll-by-Plate" or similar payment option, you do not need to register your license plate in order to receive a toll bill. However, registering your licence plate ahead of time with the agency may save on toll charges, depending on the agency. Dear Ms. *****, I am responding to your BBB Complaint case #XXXXXXX which we received on May 17, 2021 and your response on May 27, 2021. Violation Account XX-XXXXXXX NH XXXXXXXX We did not read a transponder when this vehicle travelled through the lane on 3/23/2019, the license plate was not added to your E-ZPass account until 6/30/2019, thus resulting in the violation. Once the toll is paid \$2.00, the\$25.00 fee will be waived. Violation Account XX-XXXXXXX NH *****8 We did not read a transponder for these 16 transactions, ranging from 3/14/2019-8/26/2019. You added the plate to your account on 11/25/2018 via the website as a Passenger plate type, this plate is a Passenger Vanity plate type. Due to the plate type being listed on your account incorrectly we could not charge your E-ZPass account. The plate type was corrected on 11/18/2019. Once the toll is paid \$30.75, the \$400.00 in fees will be waived. E-ZPass Account XX-XXXXXX The violations on your account occurred due to two issues. First your account was negative multiple times from 1/25/2019-2/17/2021, if there is no money on your account at the time of the transaction it will result in a violation. Second, your account was suspended in March 2021 due to your outstanding violations, an email notification was sent to the email address on file. Any transactions occurring after the suspension will result in a violation. We are willing to reduce the fees down to \$75.00 for these 196 transactions. Once the tolls are paid \$193.75 and the \$75.00 in fees are paid the remaining fees of \$1,251.50 will be waived and your account will no longer be suspended. We are extending a settlement offer to resolve the outstanding violations and administrative fees totaling \$1,735.50 for a lump sum payment of \$75.00 in administrative fees, plus tolls. Payment of \$305.50 (\$75.00 in administrative fees and \$230.50 in tolls) is due by June 18, 2021. If you wish to further dispute the administrative fees, please call XXX-XXX-XXXX ext. 9. Nicole is your case worker and would be happy to assist you. If you would prefer, you may email a hardship request to our Bureau Administrator and your case worker to explain why the administrative fees are a hardship on you: *****@gdot.nh.gov *****@gdot.nh.gov The payment should be made payable to NHDOT E-ZPass. Please note no personal checks will be accepted, we do accept money orders or certified bank checks. You may visit an E-ZPass Walk-In-Center or call the customer service center at X-XXX-XXX-XXXX to submit payment over the phone. E-ZPass New Hampshire customers added this company profile to the doxo Directory, doxo is used by these customers to manage and pay their E-ZPass New Hampshire bills all in one place. When adding E-ZPass New Hampshire to their Bills & Accounts List, doxo Users indicate the types of services they receive from E-ZPass New Hampshire, which determines the service and industry group shown in this profile of E-ZPass New Hampshire. The Bureau of Turnpikes offers introductory answers to frequently asked questions received by our office. Any links throughout the answers will guide you to further information on our Web site or from other sources. Should you have any further questions, please consult our Contact Us page. I entered an E-ZPass lane unintentionally, what should I do? If it is within 7 days of your trip, you may make a payment by visiting www.ezpass.nh.com and selecting Pay a Toll. If your trip was more than 7 days ago, you are unable to pay the toll until you receive a First Invoice in the mail. Once you receive the invoice you can submit payment for the toll and and the \$1.00 processing fee per transaction. As long as you submit the payment by the due date no further action will be required. Please note that invoices escalate to a Second Invoice with a \$1.50 processing fee per transaction after 30 days and then to a Notice of Toll Violation 30 days thereafter, and a \$25.00 fee will be applied. If you wish to dispute the invoice you need to complete Section B and D explaining your situation and return the invoice with a check for the toll fare. The E-ZPass Customer Service Representatives will review your explanation and determine if this is an inadvertant unpaid transaction per New Hampshire E-ZPass Rules & Regulations. If so, your processing/administrative fee will be waived. All customers, except those paying through the Website, will receive a determination letter (DTR) from the Customer Service Center noting the outcome of your dispute. What is E-ZPass and how does it work? E-ZPass is an electronic toll collection system, which takes cash, coins and toll tickets out of the toll collection process. Instead, drivers establish an account, prepay tolls and attach a small electronic device to their vehicles. Tolls are automatically deducted from the prepaid account as an E-ZPass customer passes through the toll lane. For additional information, visit www.ezpassnh.com. I sometimes pull a camper or trailer with my vehicle. Can I still use E-ZPass? Yes. In this instance the equipment in the lane is designed to identify that your vehicle is pulling a trailer and you will be charged accordingly. However, if you think this will be a regular occurrence, you should call the Customer Service Center and have them send you a transponder programmed for the vehicle classification you use most frequently. You should never use your transponder in a vehicle type other than the one you initially requested such as a car transponder in a tractor-trailer. Where can I find out more about E-ZPass? For information on New Hampshire's E-ZPass System, including project updates, visit our E-ZPass page. To order your E-ZPass transponder visit www.ezpassnh.com. I have a question about my E-ZPass account. Who do I contact? My transponder is not working. What do I do? First, make sure the transponder is mounted in the proper location. If it still fails to work, you need to contact the Customer Service Center at 877-643-9727 or visit one of three local walk-in centers located at the Concord, Nashua and Portsmouth. Can I swap my transponder between two or more vehicles? Yes - as long as all the vehicles are of the same classification for toll purposes. Example: Car to another car is acceptable. Car to a pickup truck with four tires is acceptable. Car to a pickup with six tires (dual wheels in the rear is not acceptable). I wish to add/delete a vehicle from my E-ZPass account. How do I do that? Contact the Customer Service Center at 877-643-9727, you can do it online at the Customer Service Center, or you can visit one of three local walk-in centers located in Concord, Nashua and Portsmouth. Will my E-ZPass transaction records be shared with other agencies or a third party? No. NHDOT and its representatives are held to the same privacy standard as outlined in RSA 236:31, however law enforcement personnel may be able to obtain records upon court intervention or exigent circumstances. I have an E-ZPass account with another toll agency. Will I get a discount on NH tolls if I use my transponder from another agency? No. Only NH E-ZPass account holders using NH transponders will get a discount at NH tolls. What discounts are offered to NH E-ZPass account holders? The discount is based on the class of vehicle not the type of account. NH E-ZPass discounts for vehicle classes 1-4 is 30% and classes 5-12 is 10%. I don't want to use my E-ZPass transponder today. I prefer to use cash. What do I do? If you desire to not use your transponder, you must remove it from the windshield/license plate and place it in the metallic "read prevent" bag that came with it or you can leave it at home. I opened an account some time ago, but I have no E-ZPass account number, no transponder and my check/credit card has not been cashed/debited. What should I do? Your application may have been lost. Call the Customer Service Center at 877-643-9727 or visit one of three local walk-in centers located in Concord, Nashua and Portsmouth. I need more mounting strips to attach my transponder to another vehicle. How do I get additional mounting strips? Supplies can be picked up at any of the three local walk-in centers located in Concord, Nashua and Portsmouth. Supplies can be ordered by calling the Customer Service Center at 877-643-9727 or online at the Customer Service Center. I have an E-ZPass account. What lanes can I use at the toll plazas? Most toll plazas have "DEDICATED E-ZPASS ONLY" lanes which will get you through the plaza quickly. These lanes have signs mounted on top of the toll plaza canopy and they are quite distinguishable from the other lanes. E-ZPass account holders may use mixed mode lanes (staffed lanes) as well. Essentially, E-ZPass account holders may use any lane where the E-ZPass Service Mark is displayed. Is cash accepted in an E-ZPass ONLY lane? NO. Only E-ZPass transponders are accepted in E-ZPass ONLY lanes. What happens if I use my transponder when the balance in my account is \$0.00 or less? If you fail to replenish your account when the balance gets low, and your actual balance drops below \$0.00 due to usage of your transponder, you may be subject to an administrative fee of \$25.00 in addition to amount of funds necessary to bring your account into compliance with the minimum balance requirements. What is the speed limit through an E-ZPass only lane? The maximum speed is 25 MPH. The reason for this is safety of the motoring public and safety of our employees that could be crossing toll lanes at any time. Could I get a speeding ticket for going too fast through an E-ZPass lane? Maybe ... NHDOT has no authorization to issue speeding tickets. This is a Department of Safety - NH State Police issue. If a State Trooper is monitoring speed through the toll lanes, and you exceed the posted speed through the E-ZPass lane, you could be issued a summons. I opened my NH E-ZPass account at a Walk-In-Center when will by transponders be activated? Transponders will not be active immediately. They will require between 48 and 72 hours to be activated. NHDOT Bureau of Turnpikes (603) 485-3806
