Reason: needed repairs due to the Y2K problem, and was simpler and cheaper distribute the free fixed version to all of what would have been to contact each individual user with a means to download and record the program. For those who need MS Word for specific projects, there are also other solutions. Most online offers for Microsoft Word free programs are illegal or misleading. Microsoft is very attentive to protect its own product property. However, a Word version was released free of charge in 1999: Word 5.5. This version has had a serious Y2K problem which, without a correction, damaged any document created on it before the year 2000. Microsoft's cost analysis has shown that it would be more expensive to contact every single license holder than it would simply be Release the program. So they published it on their site, free to download. There are some problems with this version. First of all, it's the last word MS based on DOS, so the computers running Windows 98 or later will only run it in the integrated DOS emulator. Windows 7 computers may not be able to run it at all without a DOS emulator downloaded as Dosbox. Secondly, it's no longer a supported version, so it's difficult to solve problems that Cause and difficult to find documentation for this. A quick search on Amazon or Barnes & Noble has some old How-to lists on this version, however. Download.microsoft.com/download/word97win/wd55_be/97/win98/en-us/wd55_ben.exe You may not need to download a copy of MS Word. If you have MS Works Suite on your computer, the Word Processor included is a previous version of MS Word. To the fault of Problems with Windows Me and earlier, no later version of Word 2002 has never been included, but this version is probably enough for most people. If you are looking for a processor of economic or free words that is compatible with MS Word, or if you are only looking for a word processor in general, the Open-License Open Office is a good solution. This freeware product works on most modern platforms without problems, and is mainly compatible with the MS Word size. Unless you intend to perform a heavy graphic job, the management of the team or change of the word processor similarly of the high-level word processor, the Word Processor of Word Open Office Write should work well for you.
