Each coloured thread in the circle represents a different type of online attention. The number in the centre is the Altmetric score. Social media and mainstream news media are the main sources that calculate the score. Reference managers such as Mendeley are also tracked but do not contribute to the score. Older articles often score higher because they have had more time to get noticed. To account for this, Altmetric has included the context data for other articles of a similar age. When my son started playing, I had my doubts, but after hours of playing with him, I realized this was a great game. Soon thereafter, I recommended this game for my coworkers, who then began playing this game with their sons. Every Friday night, my family and I gather around our Xbox and begin playing the game. I am thankful for GTA because it allows me to teach my son various things that occur in the real world. I feel that this prepares him for what is to come in his life, along with awareness of right and wrong. Overall, I think this is a good game for kids above the age of 10/11. Finally, I would like to wrap up this review by giving a quick reminder to all the parents reading this. I realize that this game seems difficult to allow your children access to, but we have to let them grow up at some point, and if this is what they want, then so be it, but I strongly believe that they should be allowed to play it. I think that you, as a parent, should watch over them for the first few times they play, but once you explain right from wrong to them and the consequences of such actions, you should let them play this if you believe they understand your explanations. Thank you for reading this, And I hope I have influenced your thoughts about this game. Positive MessagesEase of Play Report this review Grand Theft Auto follows the lives of three criminals, Trevor, Michael and Franklin. This game I'd just like to say is phenomenal, this tells the story of these three men in a way that pulls you in right from the moment you begin playing, the lives of these characters, the game is filled with laughs and emotional moments, thrills and chaos like you wouldn't believe. The game is fun and the story is better, but for christ's Sake this isn't a kids game! A lot of people on here will tell you that grand theft auto v is over rated and not that bad but let me tell you as someone who has actually completed the game it is about as bad as people will tell you. Grand Theft Auto V, or GTA V gets about as bad as you can possibly imagine, kids might tell you that there is no sex but let me tell you there is LOTS of sex, you have the option to go to a strip club, pick up prostitutes, ect. But even if you do avoid these things you will still end up encountering sex within the main story, the game also contains a ton of profanity, not only does the game use the Fbomb like the word "the" but you can also expect to hear the n word quite a lot too. Violence is also quite bad too, most of the time you don't have to participate in violent acts outside of but you can expect a good amount of realistic violence whether or not you do your best to avoid it. This game also contains an extremely disturbing scene of torture. Drugs and alcohol also play a big role in the game, I won't go into any details but this being a game about crime I think you can imagine how it is. This game contains very little positive messages, characters will talk about loyalty a little but that's about it. This is an very good game but you need to be extremely careful about who you let play for this is most certainly not a kids game, anyone you see saying this is a kids game is either a liar or hasn't played the game. But I do highly recommend this and if you're at the right age I would give it a try.
